

Assignment - 2A

Creating a new account -

Creating a new repository -

```
git init
git add .
git commit -m "Initial commit"
git branch -M main
git push --set-upstream origin main
```

The terminal output shows the successful creation of a new repository, adding files, and pushing them to a new branch named 'main' on GitHub. The output includes details about the commit, the files added, and the push operation.

Final result -
